Start optimising your site

Pull out a retractable building or structure to create covered space, then fold it away against a building or into a free-standing storage position.

EXTENDED FOR COVER

FOLDED AWAY

APPLICATIONS

Logistics & loading bays

Cover loading areas around lorries and vans, goods handling and dispatch.

Equipment & machinery

Protect equipment when cover is needed, then retract for maintenance or access.

Sport, events & walkways

Player access, festival entrances and sheltered pedestrian routes.

Workshops & factories

Create work areas, observation bays or welding booths with suitable materials and ventilation.

Agriculture & storage

Covered vehicle bays and storage for grain, equipment and other materials.

Clean-room applications

Sealable transfer enclosures for cleaning incoming items, specified around your clean-room requirements.

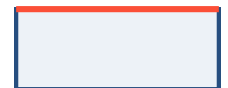

Choose your roof profile

Three styles to suit your space and the way you work.

Apex roof

Our standard roof design, suitable for outdoor structures of any size.

Flat roof

Suitable for indoor applications.

Arched roof

A premium option for small to medium-sized outdoor structures, including players' tunnels, walkways, marquees and other festival applications.

STANDARD OR BESPOKE

Standard modular

Off-the-shelf sections increase the length in 1.5 m increments. Width and height are customised to your needs.

Fully bespoke

The frame

Custom height, width and length, with or without tracking and a choice of tie-down fixing points.

The covers

Pick your cover colour and choose from a range of curtains, windows, doors and openings. All covers can be branded and printed for advertising.

Other

Motorised operation, lighting, electrical points, extractor fans and heating.

MADE IN BRITAIN

Manufactured in Britain to your specification. Our friendly team brings over 12 years of industry experience to help you choose the right building for your site.

START OPTIMISING YOUR SITE

Layout & access

Photographs and dimensions of the area that you would like to cover.

Usage

Describe the potential usage you need the structure to achieve.

WIND-LOAD OPTIONS

Choose from three wind-load specifications to suit your structure and site.

BASIC

35 mph

STANDARD

55 mph

ENHANCED

80 mph

Ratings apply to the specified building design, supports and fixings. Securing and retraction requirements are confirmed in your quotation and operating manual. Engineering calculations supplied with all tunnels.
